# Executive Summary

# Message from Co-Chairs

**On behalf of the Central New York Regional Economic Development Council (CNYREDC), we are pleased to present you with our Annual Report for the 2021–2022 year.**

Over the past 10 years, the CNYREDC has brought together community leaders, policymakers, economic development experts and the community-at-large to collectively shape, develop, execute and at times, adapt our regional economic development strategy. This blueprint built the foundation for much of the region’s economic success over the past decade. While the pandemic caused a severe disruption to much of the economy, that strong foundation allowed us to quickly recover, positioning us for future growth in our priority industry sectors. The CNYREDC continues to listen and engage with our regional partners as we adapt our strategy to meet the needs of our community.

In the update that follows, we outline where we have been, what we have accomplished, and where we are headed. Specifically, we will examine our regional workforce inventory to identify our key tradable sectors and the in-demand skills needed to fill open jobs. Utilizing data from recent surveys, we will also highlight concerns facing the current workforce and how we remove barriers to entry for those currently unable to fill open positions. These efforts will not only help people find good-paying jobs they can turn into careers but will make our economy more resilient to future disruptions.

Moving forward, the CNYREDC will continue to focus on our commitment to economic-driving projects that

act as the pillars to our regional growth and business development. We remain steadfast in our efforts to advance solution-driven initiatives for our key regional priorities: identifying and supporting workforce development training needs; addressing the growing childcare crisis; and supporting prosperity and growth in both tradable and nontradable sectors.

On behalf of the CNYREDC, thank you for your continued support as we build a stronger, more inclusive economy that benefits everyone in our region. We are eager to roll up our sleeves and get to work on behalf of the people of the region.

Linda M. LeMura, Ph.D.  
*President*

# State of the Region

For 12 years, the Central New York Regional Economic Development Council (CNYREDC) has supported bottom-up, community-based, and performance-driven economic development. This approach has built the foundation for unprecedented opportunity and growth. By doubling down on economic strategies that build on our region's assets, we are poised to build on the historic progress the region was experiencing before the COVID-19 pandemic.

The unprecedented economic devastation caused by COVID-19 highlighted the importance of inclusive growth and resilient strategies. Public, private, and civic collaboration has been the cornerstone of this process since its inception and the partnerships forged through the Regional Economic Development Councils will continue to be vital to the recovery of New York's economy.

The purpose of this annual report is to provide an update on the state of the region and our past priority projects, and to create a "Regional Workforce Inventory" that identifies the region's post-pandemic

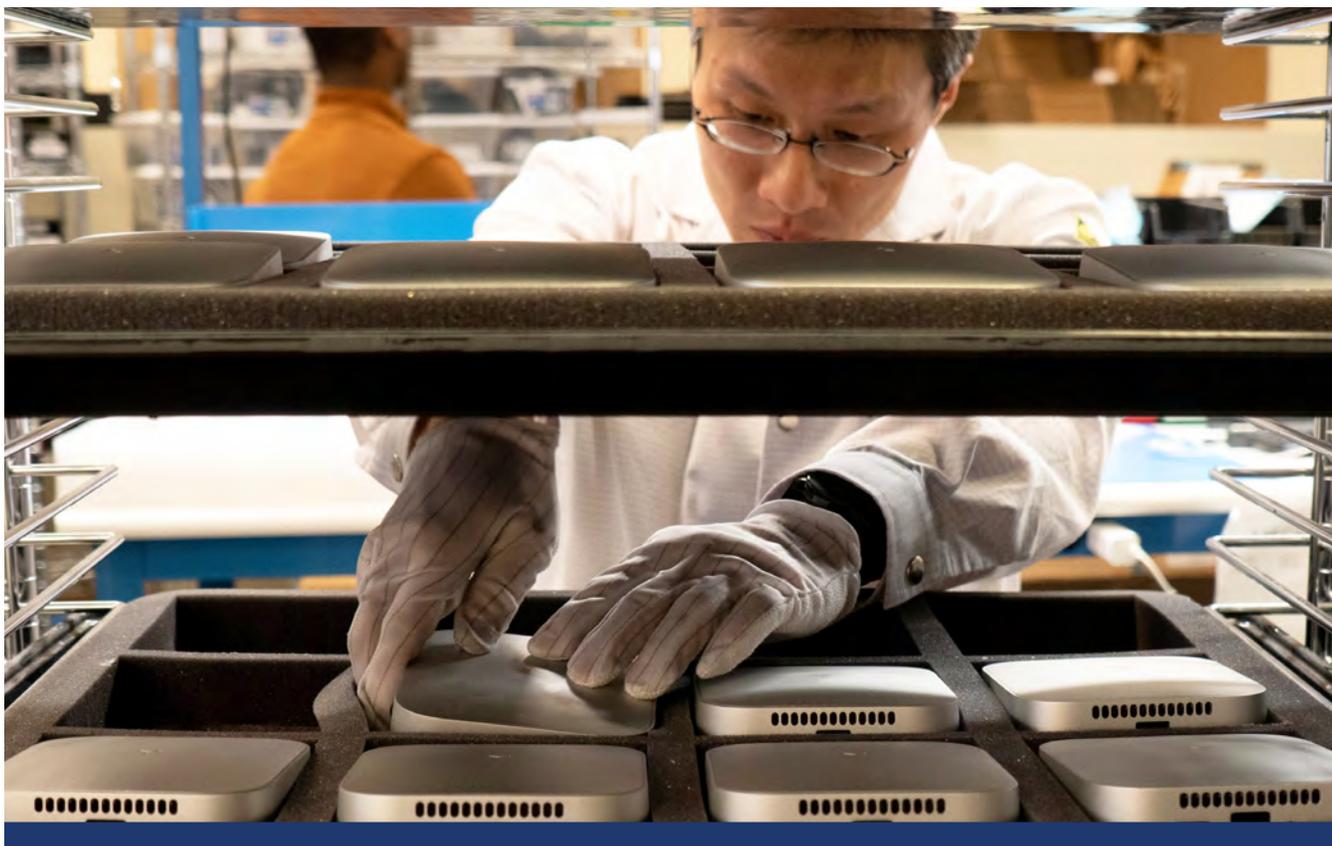

workforce needs and includes the following:

1. The priority regional tradable sectors and/or statewide target industries for targeting workforce development training programs
2. The most in-demand skill sets needed by employers
3. Populations for whom workforce training is most needed
4. The types of wraparound services most needed

The CNYREDC is committed to meeting the needs of our regional employers and job seekers. Through collaborative efforts, this workforce inventory will provide a blueprint for prioritizing investments to ensure workers have access to the skills training needed, and connecting employers with the trained workforce to meet their hiring needs.

## REGIONAL VISION

Over the last decades of the 20th century, there was a shift in global forces and that took its toll on the region. Much of the manufacturing base was dedicated to building innovations that, through the product life cycle, became commodities. As such, manufacturing for these products such as televisions, appliances, plastics products, textiles, shoes etc. moved to other parts of the world, in particular the American south or Asia, to find that labor. While new service sectors were growing, many large manufacturers with their good paying jobs and low barriers to entry either closed or left the region.

The rise of technology, innovation, and globalization changed the dynamics of productivity and economic growth. Market dynamics are more fluid and geared to reward continuous innovation in products, production techniques and business models. While manufacturing employment in Syracuse declined, employment rapidly grew in new service sectors and in the meds and eds. The region's largest employers now include SUNY Upstate Medical University, with over 9,000 employees, Syracuse University, Crouse Health, St. Joseph's Hospital Health Center, and multiple divisions of SUNY.

Syracuse boasts of having one of the largest concentrations of college students in the United States, with 36 institutions and 140,000 students. One in every ten people in the region is a college student.

Understanding this, local political, business, academic and community leaders developed a series of carefully calibrated strategies built on strengths and designed to foster a culture of collaboration. Public and private sector institutions worked together to confront head-on the challenges facing the region.

Success of this strategic and collaborative approach can be seen in the growth of the unmanned systems sector. Building on radar and sensing expertise, the region boldly pursued and won designation as one of the nation's seven test sites for unmanned systems. Through state investments the region has built an entire ecosystem that includes the nation's first 50 mile Beyond Visual Line of Site test corridor and the startup program GENIUS NY. Since 2017, GENIUS NY has invested more than \$15 million in 26 companies that have gone on to raise more than \$73.5 million in follow-on funding and create 60 jobs in the region.

Additionally, the city of Syracuse is taking steps to

Founders Day Festival in downtown Auburn, NY. Photo Credit: Cayuga Economic Development Agency

invest, modernize, and build through its Syracuse Surge initiative. The city, Onondaga County and several community partners will invest \$200+ million into Syracuse over the next three years. With support from the state, Syracuse will surge forward, bypassing old divides and connecting our people, our businesses, and our region to the future. Syracuse will be a fully connected community, fostering digital inclusion, next-generation business growth and “tech tourism.” We will bridge the digital divide, train a future-ready workforce, and create a landscape ripe for innovation, becoming the city that sets the blueprint for New York and the nation in the Fourth Industrial Revolution.

The region’s current industry profile encompasses 13 sectors identified as pivotal to its economic health and prospects. Accounting for a third of all employment, eight of those sectors are more highly concentrated in the region than across the country. Six are in manufacturing, which are tradable sectors and exert strong multiplier effects throughout the economy. Those include biomedical, clean technology, digital and electronic devices, metals production and manufacturing,

packaging and precision metalworking.

At the same time leaders were investing in these programs and initiatives to drive business development and innovation, they also were focused on creating more vibrant downtowns. The cities of Auburn, Cortland, Oneida, Oswego and Syracuse all received a \$10 million grant through the downtown revitalization initiative to redevelop and reimagine their urban cores. These investments have led to a resurgence in places like Oswego and downtown Syracuse. Since 2009, Downtown Syracuse’s population has grown 70%. With more than 4,000 residents these neighborhoods continue to grow. Currently, downtown’s occupancy rate is at 99%. In fact, \$80 million of investment activity was completed during the first year of the pandemic. More than \$172 million in development is currently underway or announced.

Since 2011, the Central New York region has invested nearly \$844 million across 888 projects. These investments have led to new job creation and the redevelopment of many long vacant properties in every county of the region.

**Cayuga County**

Cayuga County and the City of Auburn are seeing a resurgence in growth following the pandemic. New Age Renewable Energy (NARE), an industrial distiller located in King Ferry, is expanding its production into the beverage market. Over the next five years, Currier Plastics in Auburn will be expanding in the medical market. Mack Studios, Inc. embarked on a \$1.4 million expansion project adding 25,000 square feet to their existing building on Allen Street in the Auburn Technology Park.

Cayuga County has also seen growth in its tourism industry with occupancy rates fully recovering after COVID as tourists craving open air and beautiful scenery visited our inns, hotels and parks. Inns of Aurora opened a brand-new world-class spa in 2021 to add to its luxury lineup along the shores of Cayuga Lake. Veterans Memorial Park Association in Auburn is in the process of rejuvenating the Babe Ruth League Field into a tournament-level softball field. This will not only be an attraction for athletes, but will be a draw for tourism and family activity.

The City of Auburn has many DRI projects underway as well. 11 projects were awarded incentives that will allow for renovation, rehabilitation and preservation of buildings along with signage installation and equipment purchase that will benefit the downtown corridor. There is plenty of economic and business development to look forward to in Auburn and Cayuga County.

**Cortland County**

A 2017 Downtown Revitalization Initiative award winner, the city of Cortland has been undergoing dramatic transformation. A \$6 million project to rebuild historic main street will begin this summer and will feature all new utilities, curbing, sidewalks, lighting, an updated traffic pattern and public art spaces. Other private mixed-use redevelopments to historic structures in the district have been ongoing, bringing new vitality and residency to the city’s fastest-growing neighborhood. Meanwhile, a multimillion-dollar reconstruction of Clinton Avenue, a major gateway to the downtown district, is near completion, and the recently completed Renzi Cancer Center at Guthrie Cortland Medical

The City of Cortland celebrates the history of Brockway Motor Company during a four day event. Photo Credit: Cortland County Convention and Visitor’s Bureau

Chittenango Landing Canal Boat Museum Photo Credit: Madison County IDA

Center will soon be complemented with an aggressive five-year capital investment initiative to advance the community's health care options. Sports tourism is also a growing sector in Cortland County, home to the New York State Senior Games and where two new all-season baseball and softball fields are under construction to support the two already in place at Gutchess Lumber Sports Complex.

### **Madison County**

Despite ongoing disruption from the Covid pandemic, Madison County has continued to work towards improving the economy of the County and region.

SEPAAC manufacturing acquired the former Lakeside Innovative Technologies CNC manufacturing facility in the Harbor Lights Business Park, expanding their footprint by 50% with the expectation of adding at least seven new full-time employees as they grow. The former Harden furniture warehouse, which has sat vacant for over a decade, has been reimagined as a

workforce housing project. The property now features 28 luxury apartments, and the owners have invested nearly \$4 million to help turn around this neighborhood which desperately needed revitalization. The community, its political leaders, and area employers have fully supported this project as the demand for workforce housing increases.

Late in 2021, the City of Oneida was awarded \$10 million dollars in the Downtown Revitalization Initiative (DRI) by New York State. The city is currently working on their Strategic Investment Plan, and maximizing the potential to leverage state assistance for both public and private investments. Some of the transformational projects include the redevelopment of the Hotel Oneida, the former Oneida Daily Dispatch building, and the Kallet Theater. Vacant buildings will be redeveloped into retail and professional office space, while upper floors will be converted into new apartments. New dining options and even a brewery are expected to propel the existing momentum that has been growing in the downtown area for a number of years.

## Onondaga County

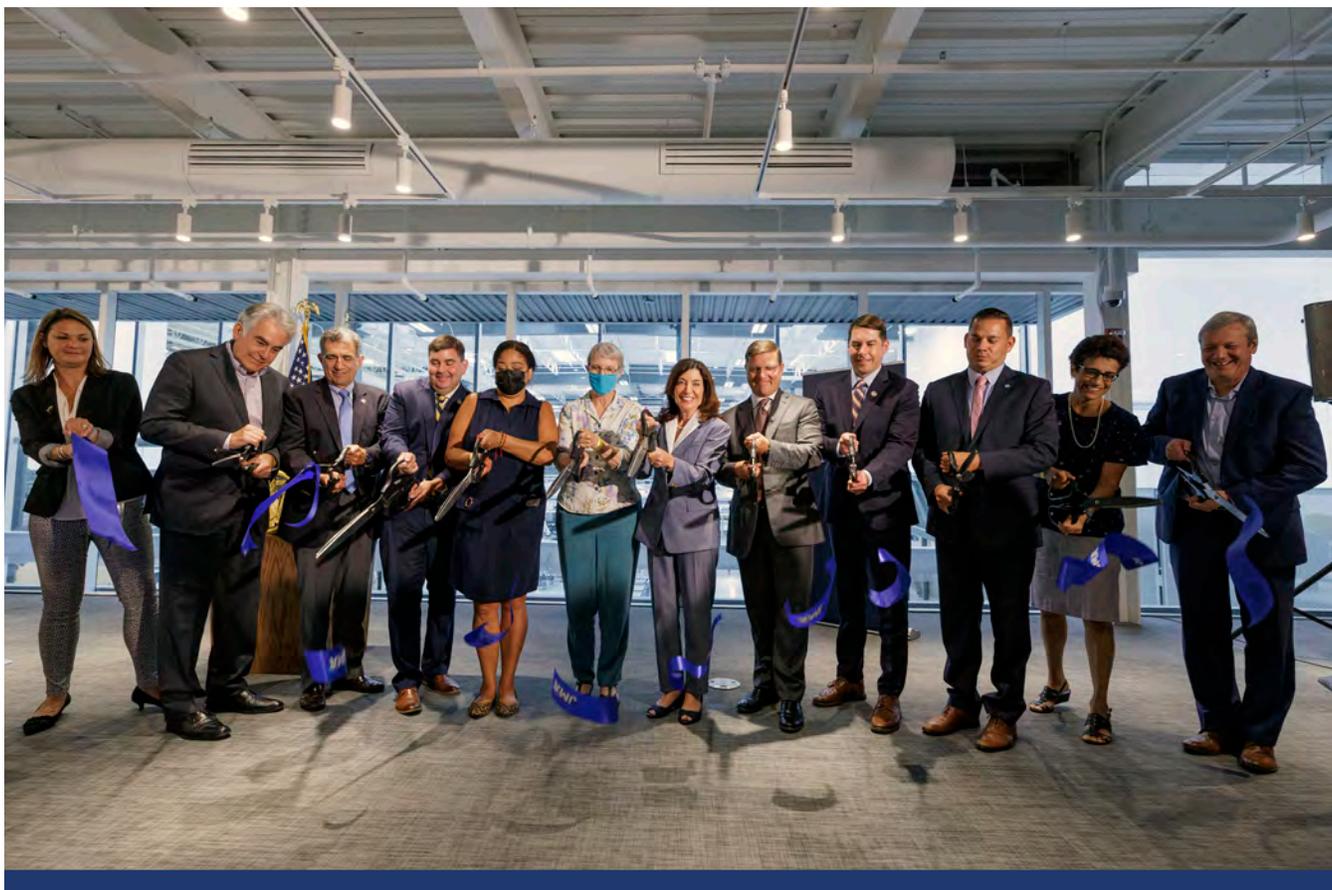

It has been a productive year in economic development for Onondaga County. The city of Syracuse was awarded \$10 million to revitalize the southern gateway. This investment and others will catalyze business growth and neighborhood connectivity in a traditionally underinvested part of the city.

Additionally, two notable projects have received attention for their significant contributions to the area. JMA Wireless recently opened its brand new 5G wireless manufacturing facility in the Southside of Syracuse. This \$50 million investment will create 200 jobs and will be one of the leading manufacturing locations in the country. Similarly, Empire Polymer Solutions opened their doors in 2022. The project consisted of renovating the 205,000 square foot building at 7528 State Fair Blvd in the Town of Van Buren, the former Syroco Site. Empire Polymer Solutions brings an innovative approach to plastic processing and manufacturing. The company will bring significant plastic processing equipment to the site. The \$7.135 million project is projected to create 70 jobs within the next five years.

## Oswego County

In June of this year, Operation Oswego County, Inc. (OOC) held its first in person Annual Meeting since the beginning of the COVID-19 pandemic in the City of Oswego, which was attended by more than 150 business and governmental leaders. Results of the Round 11 CFA and other Oswego County economic development projects were presented. In spite of the pandemic, 32 businesses were directly assisted in 2021, with investments of over \$167 million that impacted over 1,400 jobs in the County. Looking forward to future projects, OOC also recently co-hosted with Empire State Development, a CFA Intent to Propose workshop in Oswego which was attended by over 25 businesses and local leaders where details on eligibility and the process to apply for the various funding programs were shared.

In 2021 Novelis announced plans to invest \$130 million in upgrades to its aluminum flat rolled products manufacturing complex in the Town of Scriba which will allow the plant to increase capacity by 124,000 metric tons. Novelis is the largest manufacturing employer in

Mayor Barlow speaks at the ribbon cutting of the new Harbor View Square mixed-use building in the City of Oswego. Photo Credit: Maddy Peet

Oswego County with 1,150 employees.

The City of Oswego has seen unprecedented growth as 11 of the 12 Downtown Revitalization Initiative projects have been completed along the downtown waterfront, bringing new residents and businesses alike. This has spurred additional private commercial investments along the downtown waterfront. The final project, the Lake Ontario Indoor Water Park, is slated to finish in late 2022.

The City of Fulton received good news in 2021 from Lt. Governor Kathy Hochul when she announced that 17 projects were selected to receive DRI funding- which will be a catalyst to redevelop the former Nestle site, waterfront, health care and mixed use developments along the City’s east side downtown. Several of the Fulton DRI projects have been delayed due to supply chain issues and cost increases but are still slated to go forward. One example is the Manufacturing Startup Facility on the former Nestle Site, which received \$860,000 in DRI funding.

## REGIONAL SUMMARY

The transformational success in each county in the region is the result of our regionally specific strategic plan that assessed our industry strengths and identified areas where investments would have the greatest impact. Including in this plan are three strategic goals:

1. Strengthen Targeted Industry Concentrations that Leverage Unique Economic Assets
2. Improve Competitiveness in and Connections to Regional, National and Global Economies
3. Revitalize the Region’s Urban Cores, Main Streets and Neighborhoods

Additionally, the council continues to ensure all investments put forth in the recommendations and report align with the four inter-connected strategic initiatives identified by New York State:

**Placemaking:** Creating accessible job centers, sustainable infrastructure, and livable communities.

**Workforce:** Ensuring that jobs in high paying, in-demand tradable sectors are filled in an equitable way through targeted job training and education.

**Tradable sectors:** Targeting industry sectors that are part of a global market, including, but not limited to, manufacturing, agricultural products, and energy production to increase expert-based employment opportunities

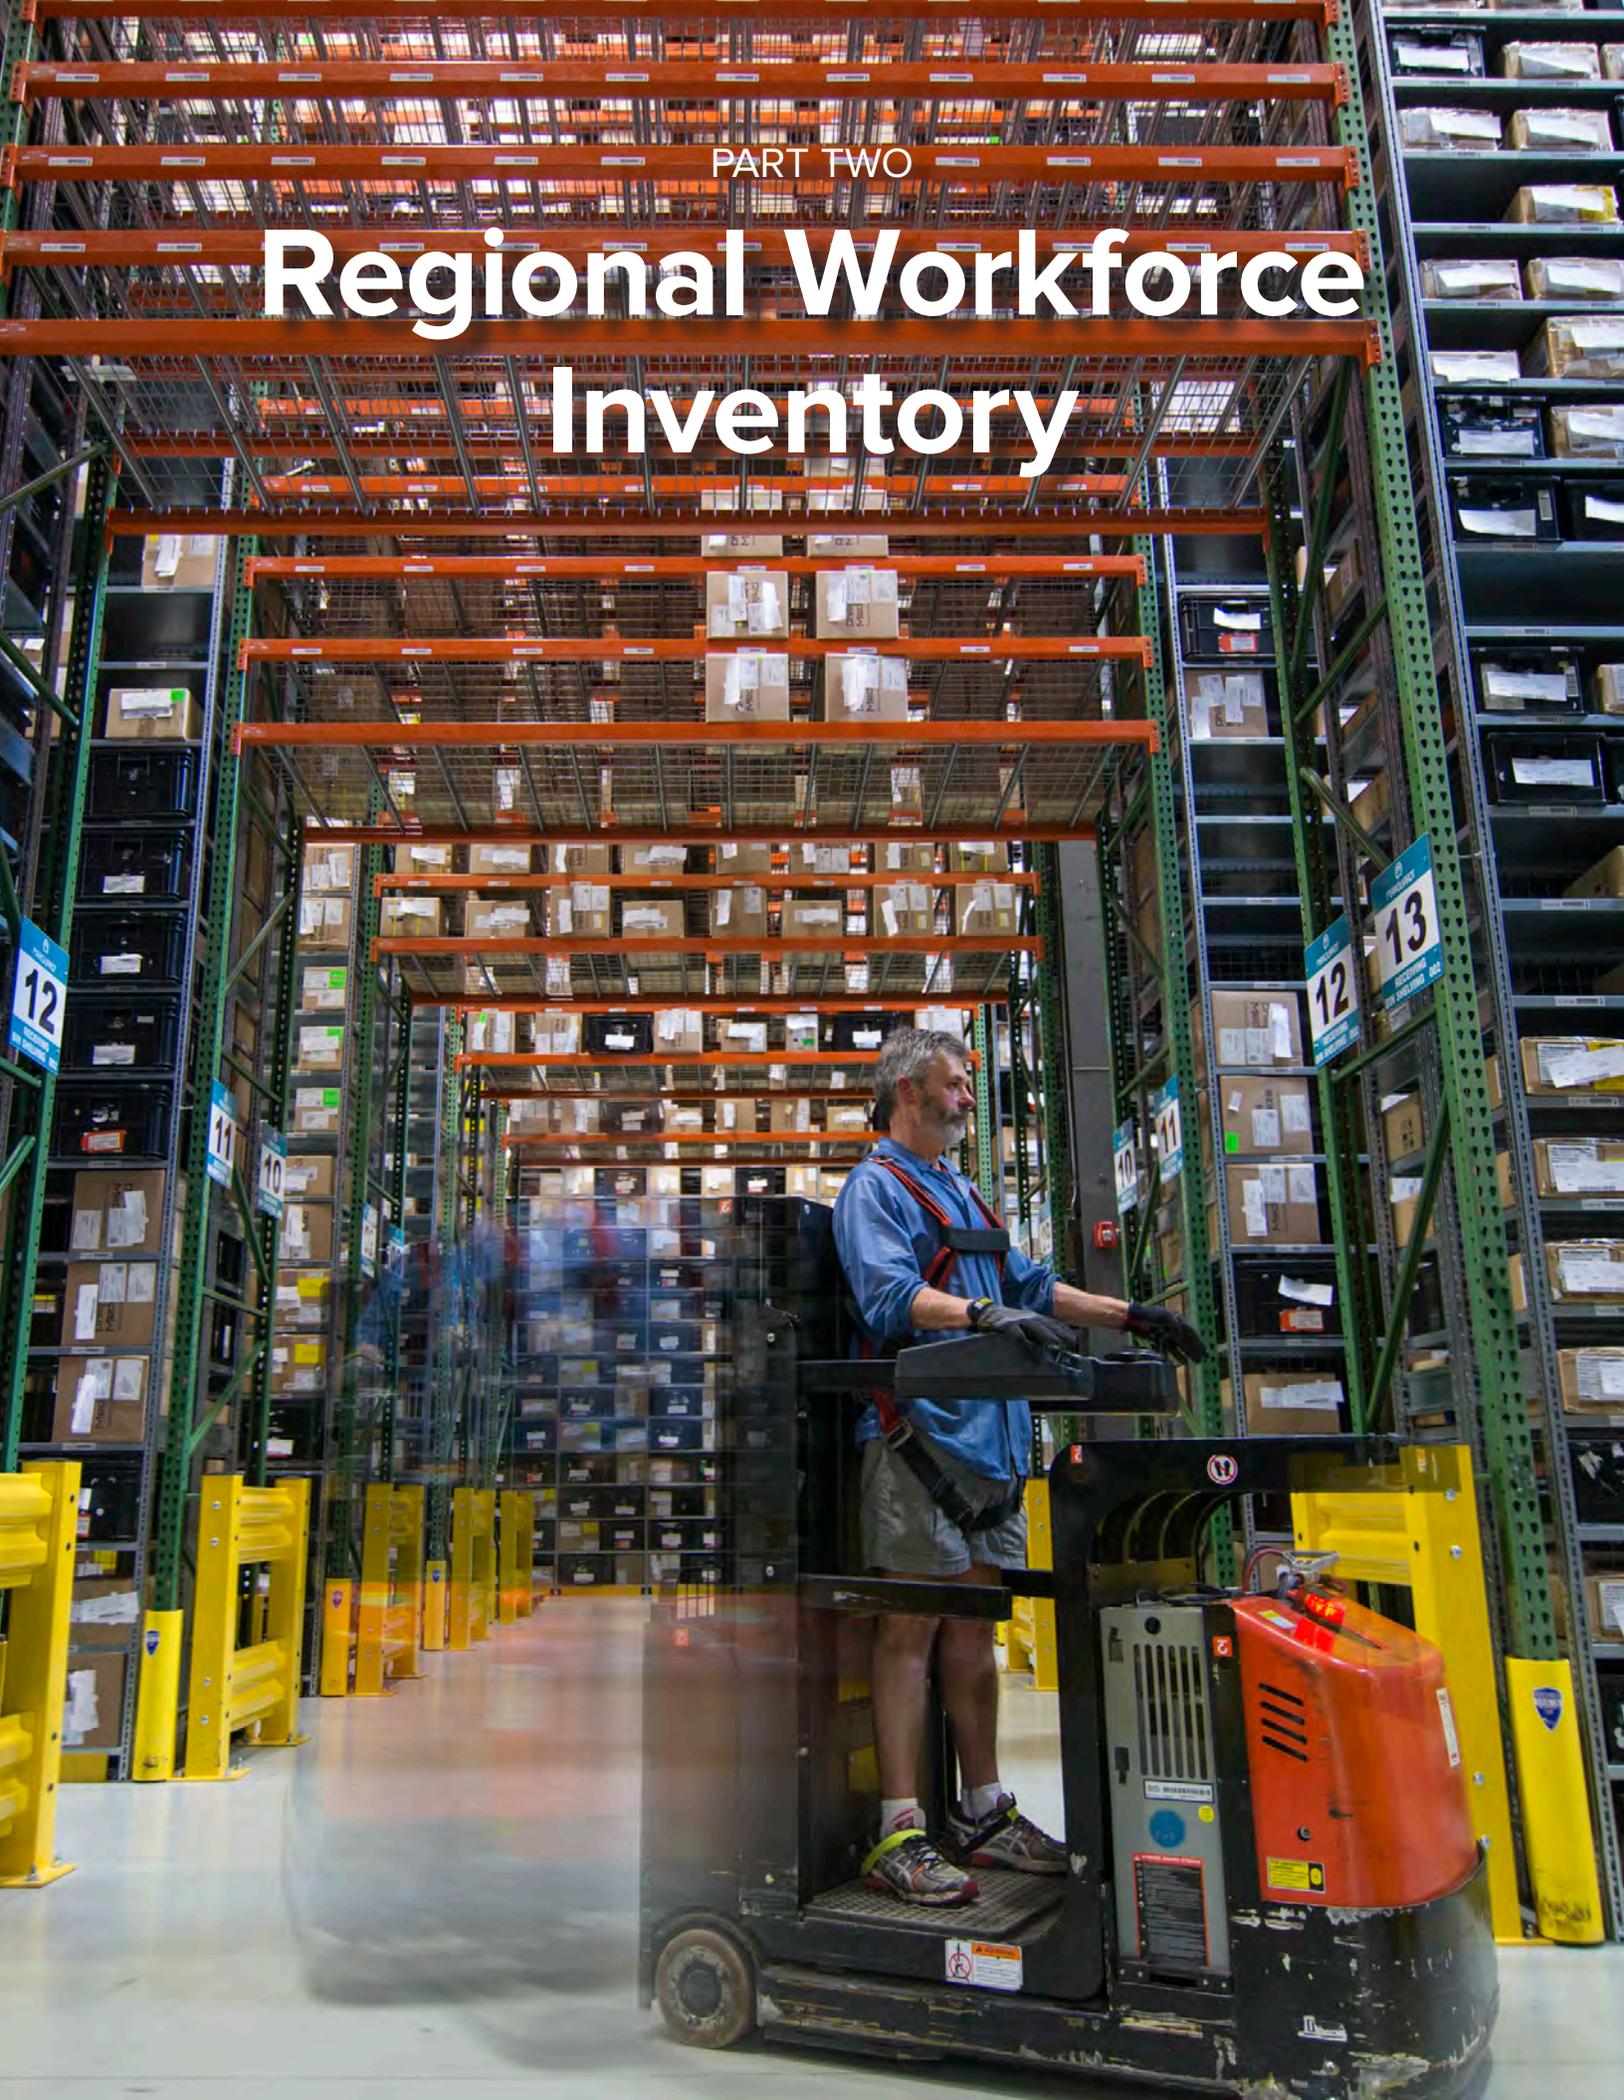

**Innovation:** Creating synergies between cutting-edge research and product commercialization to drive the economy forward.

This region’s progress has only ever been limited by its ability to envision a better future. Its success has always been the result of community and business leaders working together to solve challenges. Just as the business leaders of its past led community initiatives, today’s leaders are deeply engaged in the economic future for the region.

PART TWO

# Regional Workforce Inventory

# Regional Workforce Inventory

Among the most pressing concerns we hear across both the region and state is the inability of our employers to fill open positions and potential employees to obtain the skills and means needed to fill those positions. Knowing this, Governor Hochul has tasked the CNYREDC with creating a “Regional Workforce Inventory” to better connect economic development efforts with workforce training, to ensure that employers in growing industries have access to the high-quality, skilled labor needed to be competitive.

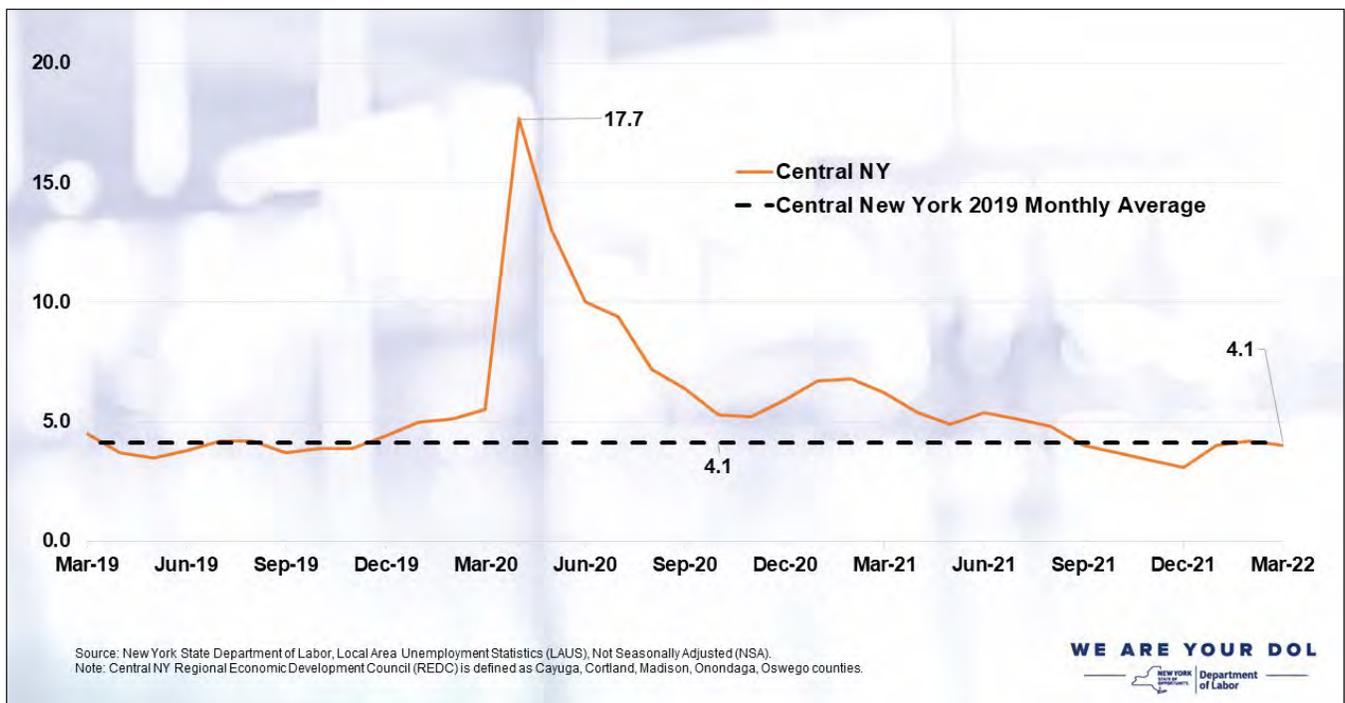

The COVID-19 pandemic saw unprecedented economic destruction, as most businesses were forced to close and unemployment spiked to 17.7% in the region. Our economy has since started to recover, with many industry sectors regaining most their lost jobs, and unemployment sitting just below the monthly average in 2019.

On the surface, these indicators seem to reflect a

strong economy, and business production appears strong. However, a recent business and job seeker survey, along with data from the NYS Department of Labor, show some underlying weaknesses that need to be addressed. Specifically, businesses are struggling to attract workers, a trend that is exacerbated by competition for a limited talent pool due to the low unemployment rate. When asked why roles are difficult to fill, businesses responded:

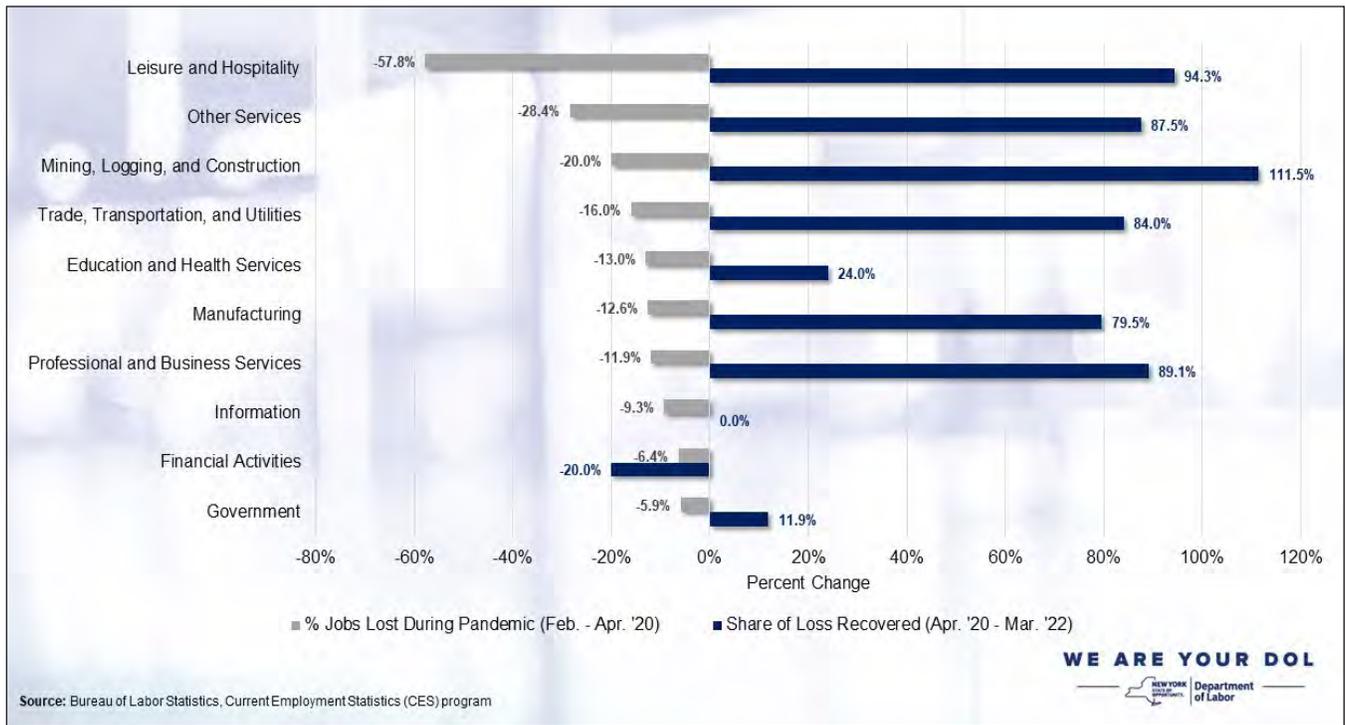

- Lack of Qualified Candidates: 46%
- Compensation: 41%
- Lack of Applicants: 21%
- Shift/Schedule: 20%
- Lack of Experience: 17%
- Applicants Lack Skills: 16%
- Nature of Work: 15%

## CENTRAL NEW YORK: UNEMPLOYMENT RATE (NSA)

## MANY SECTORS HAVE REGAINED MOST OF THE JOBS LOST DURING THE PANDEMIC

Percent change in employment by sector, Central New York (not seasonally adjusted)

Conversely, data from the job seeker survey demonstrates that workers’ desires and expectations have shifted and there is a need to establish and strengthen their professional networks. Additionally, as industry redeployment continues, there is significant need for training and upskilling to fill open positions. Aside from traditional barriers including childcare, transportation and skills training assistance, respondents also cited several reasons they struggle to secure a job. (see chart below)

Additionally, the current state labor force is getting older (see chart on next page). Since 2011, the number

of employees between the age of 45 and 54 has significantly decreased while the number of 55+ has increased. Not only will this lead to a smaller overall workforce as those populations continue to retire, but many hold specific knowledge and skills that need to be passed on to younger workers, specifically in the skilled-trades sectors. Increased awareness and training in skilled-trade positions will be vital to the continuity of this workforce. This includes a larger conversation about post high school career options that do not include college or other four-year degree programs.

BARRIERS TO EMPLOYMENT	MILD	SEVERE
Discrimination Due to Age	28%	16%
Lack Adequate Experience in the Field	27%	9%
Lack the Right Degree, Certificate or Credential	27%	13%
Lack a Large Professional Network	27%	12%
Lack Adequate Modern/Digital Skills	25%	10%
Need Further Education or Training	25%	8%

For this regional workforce inventory, we will focus on our priority regional tradable sectors for targeting workforce development training programs. The tradable sector of our economy produces goods and services that are “traded” to residents in other regions, states, or countries. This sector is important because they can leverage the world market allowing them to grow while bringing new funds into the local economy.

Specifically, we will focus on four industries:

-  **Agribusiness**
-  **High Tech Manufacturing**
-  **Smart Systems Cluster**
-  **Research and Development at Institutions of Higher Education**

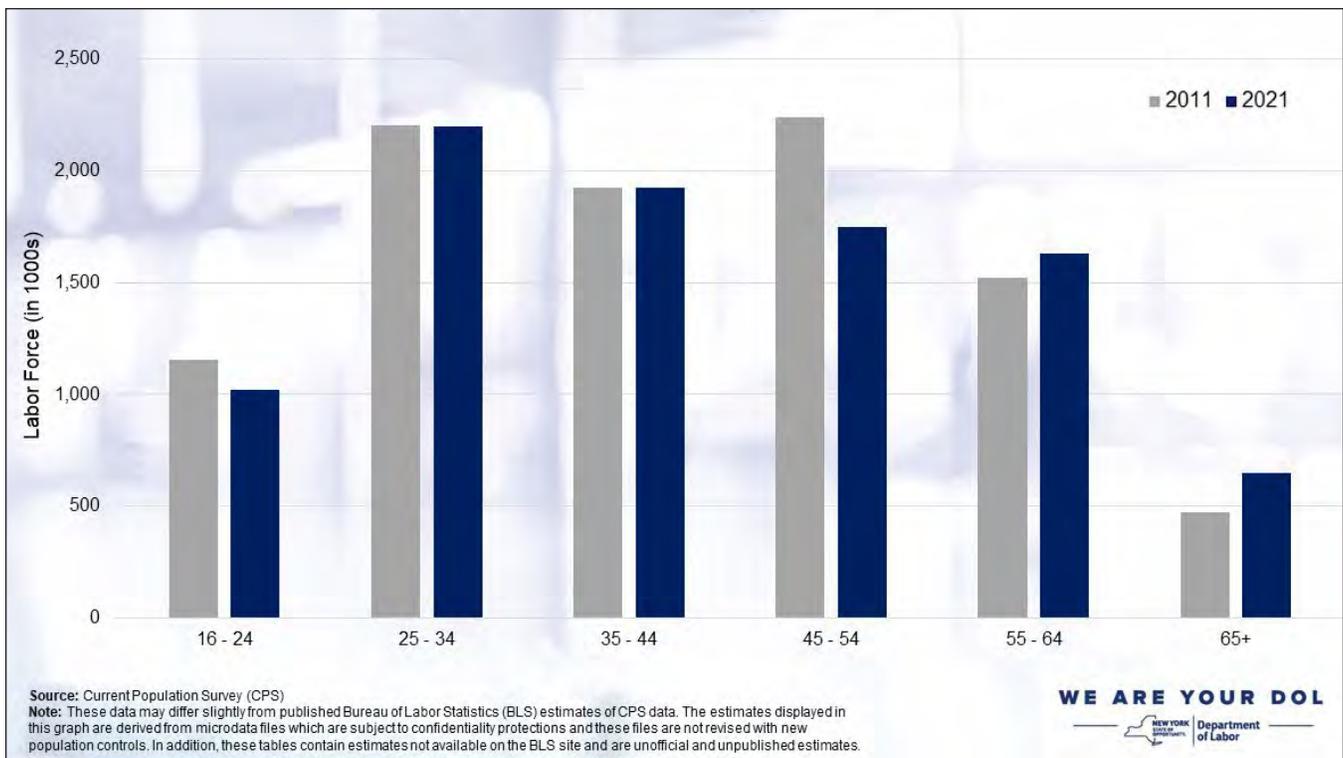

This workforce inventory will create a blueprint for investing in skills training, wraparound services, and creating a pipeline for employers to locate and hire trained workers to fill their open positions.

Marquardt’s on-site NYS-certified Apprentices programs help to maintain a talent pipeline and develop extremely well rounded toolmakers, engineers, and equipment builders. Photo Credit: Marquardt Switches, Inc.

## THE STATE LABOR FORCE IS GETTING OLDER

Annual average labor force level (in 1000s), by age group, New York State, 2011 & 2021

# Priority Regional Tradable Sectors and In-Demand Skill Sets

In order to address regional job growth as well as driving outside revenue into our regional economy, it is critical to identify and focus on how regional tradable and non tradable sectors can grow together. Strategic growth in the following four areas will create revenue generation coupled with the undisputed multiplier effect in regional jobs and income, while providing and significant goods and service revenue generation well beyond our geographic footprint.

## Agribusiness

Agribusiness has served as a cornerstone of the Central New York economy for over a century, ever since the Erie Canal enabled wide-scale export of agriculture commodities from the region. The region is centrally located within 500 miles of a market of over 100 million consumers, and offers an abundance of freshwater lakes, boundless farmland, inexhaustible groups of hardworking people, and cutting-edge research and development that is evolving the agricultural sector. As a result, it has a long tradition of growing, making, storing, moving, and selling high quality food and farm products.

There are more than 3,500 farms and more than 200 food processing companies in Central New York, employing nearly 4,000 people. The region hosts 44% of the state's working farmland, employs 1/3 of all food and agriculture workers in the state, and has seen an increase in ag-economy employment by 25.4% since 2010. The region is a national leader in milk, cottage cheese, sour cream, and yogurt production, and is New York's most productive region for onions, poultry meat and eggs. Agricultural production skills are always in demand in this constantly changing industry, as are employee management skills, and building construction, maintenance, and repair skills. Technology skills needed today include electronics, diesel mechanics, welding, etc.; soon, as robotics and other forms of

automation expand, skills required to implement, maintain, and repair these technologies will be increasingly important. Specific to the dairy sector, CDL truck drivers are in high demand, as the dairy industry is struggling to get milk hauled from farms to processing facilities.

Milking lines at Oakwood Farm in Cayuga County.  
Photo Credit: Cayuga Economic Development Agency.

## SPOTLIGHT: AGRIBUSINESS

“With our Grow-NY prize money, we created high-paying research and engineering jobs, took up lab space at Syracuse University, and built the New York Poultry Research Hub in Cayuga County. We have been able to connect academic research with poultry startups and corporates, to commercialize validated research, leading to further entrepreneurial activity and are thrilled to put down roots in the Grow-NY region.”

— YAEL ALTER,  
Soos Technology founder

### GROW-NY, A FOOD AND AGRICULTURE INNOVATION PROGRAM

As a strategy to bolster the region’s existing agrifood activity, the Grow-NY Food and Ag competition was launched. Through this accelerator program, food and ag startups from all over the world. have competed for \$3 million in prize money.

The innovations that are pitched during the competition and funded and accelerated as a part of the program have profound effects on the lives and livelihoods of farmers and food- and drink makers operating in the region and beyond. Technologies that address labor shortages, mitigate the harmful effects of climate change, shift market demand to align with consumer behavior, and decentralize food supply chains strengthen Central New York’s agricultural identity and economy.

In the three years since the first competition took place, the 21 winning Grow-NY startups have created

over 250 new direct and indirect jobs, attracted millions of dollars in follow-on funding from investors, and leased and utilized hundreds of thousands of square feet of production space.

### SOOS TECHNOLOGY

2020 \$1 million winner Soos Technology is a poultry tech startup from Kidron, Israel, that has innovated an incubation system that affects the sex development process in poultry embryo, turning genetic males into functional female chicks. Since winning Grow-NY, they have engaged in an on-going research collaboration with Syracuse University focusing on gene expression and hormonal profiling. Future research will focus on shell and nutrient analysis of eggs laid by sex reassigned chickens versus genetically female chickens. As countries in the European Union and elsewhere begin to outlaw the culling of male chicks, demand for Soos’ humane and efficient solution is on the rise.

## High-Tech Manufacturing

With its ability to create and sustain high paying jobs, create tradable world class products that generate revenue from outside the region, as well as its undisputed multiplier effect into both tradable and non-tradable sectors with the region, manufacturing remains a top sector priority for the Central New York region as we continue to adapt and recover. The CNYREDC explicitly understands that supporting and rebuilding our region’s globally competitive, innovation-based manufacturing sector is of utmost importance to our region’s economic stability and resurgence, making it a primary tradable sector pillar focus in our regional plan.

Manufacturing has long provided our community with a wealth of opportunity and benefit because of its strong base here in Central New York. Its history of overcoming economic hardships and defying an increasing global competition shows its ability to withstand, adapt, recover and remain a community constant. The opportunities within for long term, fulfilling and well-paying careers right in the communities where our residents, work, play and live are all factors that the REDC understands we need to protect, support and foster growth.

Moreover, the CNYREDC recognizes that focusing on the needs of the manufacturing sector to not only retain existing but attract new business is key the continued recovery of our regional state and local economies, is essential for protecting both urban and rural communities that each of these are located in, and creating new exciting career opportunities for minorities and low-income families to increase their social and economic mobility.

In terms of supporting the manufacturing sector, one of the most critical needs is resources to help find, attract and curate skilled workers. While the sector suffered many challenges during the pandemic, when asked about their greatest needs, the undisputed response is “reliable skilled talent.” Even prior to the pandemic, manufacturers throughout Central New York were challenged with a mass exodus of talent due to the aging workforce. Moreover, advancement in technology and operations are changing the way these companies do business, which in turn changes the needs they have for their workforce.

In looking at any successful manufacturer today, you will see significant advancement in innovation and the way they operate their businesses. The jobs they are offering today are highly skilled in specific technical areas. The best platform the CNYREDC can provide

support in this capacity is through continued and enhanced skilled workforce services and programs.

Successful employment today in high tech manufacturing requires a significant investment in education and talent pipeline resources. Thanks to our region’s abundance in secondary and higher educational programs and systems, the CNYREDC sees our region perfectly positioned to continue to support and grow our world class regional manufacturing sector. Intermediary programs connecting industry and academia provide the connections to identify and curate skilled workforce to fill the jobs most needed by our manufacturing businesses. Continued and enhanced support for Apprenticeships, Related Technical Instructions (RTI), On-the-job Training (OTJ) and Job Shadow opportunities remain the top priority focus in supporting our regional manufacturing sector. The REDC will also continue to be proactive by collecting feedback and information from the manufacturing sector on the evolving needs and ways we can continue to support or improve the services provided through surveys, roundtables, presentations and tours.

Marquardt’s 24/7 assembly production area features both automated and semi-automated assembly lines. Photo Credit: Marquardt Switches, Inc.

## SPOTLIGHT: HIGH-TECH MANUFACTURING

“The apprenticeship program has done wonders. It is not just about the income and providing for my family; it’s about the advanced skills I’ve developed and how these skills will open up more opportunities for me. I could never have pictured myself in the position I am today. I love what I do. Going through and completing the program is one of the smartest decisions I’ve made.”

—PATRICK ROGERS

Recent MIAP Apprenticeship graduate, Patrick Rogers, celebrating his program completion with his family in front of Anoplate in Syracuse where he earned his Journey Worker certification

### REGIONAL MANUFACTURING EXCELLENCE THROUGH APPRENTICESHIPS

Central New York has become synonymous with world class apprenticeship training excellence thanks to its partnership with the New York State Department of Labor in its Manufacturers Intermediary Apprenticeship Program (MIAP). Established in 2016, MIAP serves as an intermediary support system which helps small and medium-sized companies throughout New York establish registered apprenticeships at their companies.

Apprentices train for specific jobs that manufacturers are looking to fill and earn the nationally recognized Journey Worker Certificate. Previously held entry-level positions thus become available, providing opportunities for other individuals, helping to fill the

community’s talent pipeline.

MIAP now serves as the standard for additional regionally supporting apprenticeship programs popping up throughout the state, all seeking to create similar successes and outcomes in their talent pipelines. Since its inception, MIAP has developed 597 apprentices for 158 employers, with 62 apprentices to Journey Worker status statewide.

### ANOPLATE

Patrick Rogers earned his Journey Worker Certificate at Anoplate in the fall of 2021. Rogers grew up in Central New York and decided to raise a family here. He joined Anoplate as a Maintenance Helper, and after completing the four-year apprenticeship program, he is now a Journey Worker Maintenance Mechanic.

### Research and Development at Institutions of Higher Education

Central New York is home to over ten public and private colleges and universities. These institutions have made critical partnerships with public and private entities, both globally and worldwide, to enhance their research and development capabilities. The CNYREDC is committed to ensuring that our institutions of higher education have the resources needed to continue to advance groundbreaking initiatives that better our community and the world at large. Our colleges and universities are contributing to enhancements of 21st-century priorities like unmanned aerial systems (UAS), cybersecurity, environmental conservation, and public health. Collaborations range from drone imagery with the Syracuse Fire Department to consultations with water departments across the US on algal bloom detection and removal, to helping solve the logistical

and inventory control needs of global firms like GE. The research and development being done at our institutions serve as a meaningful complement to the R&D being done at our local organizations such as SRC, Inc. and Lockheed Martin.

Additionally, students participating in research and development will cultivate meaningful skills such as the ability to think critically, understand qualitative and quantitative data, communicate clearly and concisely; and develop the capability to remain focused and diligent while pursuing complex problems and projects. Students who hone these skills and abilities will not only be poised to continue their research professionally, but they'll also become attractive candidates for employers from all industries. CNYREDC recognizes that higher education's research and development activity has both an immediate and lasting impact on our community.

## SPOTLIGHT: RESEARCH AND DEVELOPMENT AT INSTITUTIONS OF HIGHER LEARNING

“Our research teams build the intellectual fabric of discovery through innovation and exploration.

These experiences create a research network that transcends individual projects, builds a pipeline for discovery of non-traditional research participants, and sets an example of ethical research practices. Most importantly, they evince the Jesuit principles of *magis* (more), seeking excellence in all of their endeavors and giving back to the Central New York community.”

—MARTHA GRABOWSKI,  
Le Moyne professor

### LE MOYNE COLLEGE 2022–2023 MCDEVITT INFORMATION SYSTEMS (IS) RESEARCH FELLOWS

For the past decade (2012-2022), the McDevitt Center has supported a series of interdisciplinary Information Systems (IS) research projects that are associated with ‘Grand Challenges’—areas of enduring interest, of critical importance, worthy of serious scholarship and investigation, and appropriate venues for long-term interdisciplinary research, programming, investment, and exploration

Fellows and their mentors participate in MIS 471/771, a Research Methods course, and in research seminars. McDevitt IS Research Fellows also share their knowledge, skills and abilities with the wider community and represent the College on- and off-campus. The 2022-2023 McDevitt IS Research Fellows and their projects include:

- **Wearable Augmented Reality Technology Evaluation** (Danny Kelly '23, MSIS '24, with Staten Island Ferry—JP Rancy '16, MSIS'17 SU PhD '23—Mentor, Le Moyne Pre Doctoral Fellow)
- **Critical Infrastructure Resource Allocation for Arctic Emergency Response** (Prof. Martha Grabowski, Nolan Hillhouse '23, NSF Navigating the New Arctic Project with Clemson University, University of Alaska Anchorage, North Carolina State University)
- **Unmanned Aerial Systems for Real-time Manufacturing & Logistics Inventory Control** (J. McGarvey '24, with Shane Stockhauser '13 MBA '18/McIntosh Box & Pallet, Syracuse, NY)
- **Machine Learning Models for Natural Disaster Risk Analytics** (Samantha Livingston '23, Prof. Mehmet Kilinc, with Eddie Harper '03, Tim Riley, Statewide Underwriting Services, Schenectady, Beacon, NY)
- **Unmanned Aerial Systems in Resilient Arctic Communications Architectures** (Prof. Martha Grabowski, 1 student, with US Coast Guard, Alaska Center for Unmanned Systems Integration (ACAUSI)/Fairbanks, AK; MITRE Corporation/Colorado)
- **Sentiment Analysis for Municipal Cybersecurity Surveillance Systems** (Dilpreet Arora, with Prof. Yue Han, City of Syracuse Surveillance Technology Task Force)

**Smart Systems Cluster**

In today’s digitally connected world, the ability to manage, sense, analyze, and interpret data and information in real time has become essential for making the human and autonomous decisions necessary for commerce to thrive. The technical and analytic capabilities that make this possible serve as the backbone of Central New York’s growing information technology Smart Systems cluster. These core industrial capabilities are being deployed in our region to solve real-world problems in market verticals that are critical to our national economic competitiveness including semiconductor chip manufacturing and unmanned systems technology (UST), radar and sensing, Internet of Things (IoT), and 5G telecommunications. Cluster growth interventions are intentionally designed to drive equitable access to opportunity for all our region’s residents.

Through continued investment, Central New York is poised to further position the region as a global leader in the research, development, manufacturing, and deployment of Smart Systems. The Smart Systems cluster will drive the region’s full recovery from the COVID-19 pandemic while building inclusive regional prosperity and resilience to future economic shocks. It will help America innovate, reshore, and develop critical advanced manufacturing and supply chain networks. A diverse leadership table will facilitate decision-making and investments that are designed intentionally and inclusively to ensure economic benefits flow to all residents through the following interventions:

**Infrastructure & Supply Chain:** Developing shovel-ready real estate and infrastructure to attract a wide range of advanced manufacturing companies and accompanying supply chain firms. Based on the high potential of existing assets to meet specific industry needs, particular emphasis is placed on the semiconductor computer chip sector, which aligns with federal efforts to re-shore advanced manufacturing supply chains critical to ensuring national security and resilience.

**Innovation & Commercialization:** Developing specialized infrastructure, equipment, and commercialization projects to nurture industry partners as they build Smart Systems technologies, components, and products. Enhanced by quantum R&D and technology, these innovations address everyday problems in real-time data management, healthcare access, municipal systems, delivery of goods and services, aerospace and national defense, communications, civil defense, and agriculture.

**Education & Talent:** Building a more diverse and inclusive Smart Systems talent pipeline through 1) highly coordinated, employer-led and employee-informed workforce development programs that uncover untapped talent in the region’s urban and rural communities; 2) K-12 education career orientation infrastructure and programming; and 3) high-tech talent attraction and education.

**Entrepreneurship:** Providing entrepreneurial assistance across the full life cycle of business ideation, formation, growth, and expansion, leveraging successful models to drive stronger XBE startup activity. Supporting quantum R&D to build a sustainable pipeline of new cluster companies, innovative technology, and next generation products and services for the global marketplace.

AiRXOS prepares for a test flight of its drone technology at Griffis Air Base. Photo Credit: NUAIR

## SPOTLIGHT: SMART SYSTEMS CLUSTER

“The demo was our first flight in front of potential customers in the U.S. More importantly, is the first flight in public, demonstrating our proprietary autopilot solution, the Aerial Robotics Autopilot Architecture (ARAA), as a reliable and powerful solution for a hybrid between helicopter and gyrocopter. We were proud to have this opportunity to test with the support of the GENIUS NY Program.”

—JÖRG SCHAMUHN,  
CEO of Aerial Robotics

### THE WORLD’S LARGEST BUSINESS ACCELERATOR FOR UNCREWED SYSTEMS, LOT AND ROBOTICS

GENIUS NY is the world’s largest business accelerator competition for uncrewed systems, IoT and robotics startups. Five winners are selected for the GENIUS NY accelerator each year.

Winners receive a large investment; one grand prize winner receives \$1 million, followed by four \$500,000 investments to the remaining teams. Winners also receive funding in the form of a monthly stipend in Phase I, free office space and amenities, workshops and events, business training, a dedicated group of executive advisors, industry mentors, and recruiting, marketing, and fundraising support. Each cohort is integrated into the larger regional effort to grow uncrewed aerial systems in Central New York and the Mohawk Valley, gain access to world-leading infrastructure and testing assets, and have opportunities to connect with investors for follow on funding.

### AIRIAL ROBOTICS

Since 2017, GENIUS NY has invested \$15 million in 26 companies from around the world and brought them to Central New York to participate in the yearlong in-residence accelerator. GENIUS NY companies have raised more than \$100 million in follow-on funding and have created more than 70 jobs in Upstate New York.

This May, Genius NY \$500,000 Winner Aerial Robotics successfully tested and demonstrated its Gyrotrak GT20, a hybrid helicopter and gyrocopter UAV (uncrewed aerial vehicle) at the FAA-designated New York UAS Test Site at Griffiss International Airport managed by NUAIR in Rome, N.Y. This was the first flight demonstration of its kind in the United States. The GT20 Gyrotrak can be equipped with a variety of sensors enabling it to be used for a broad range of uses, including medical transport, high precision mapping, line inspection and more.

# Populations for Workforce Training

The continuing skills gap crisis has been a leading issue in our community and continues to be a significant priority for the CNYREDC. The skills gap is wide, growing, and takes on many different forms. On the one hand, employers continue to express frustration in finding people to employ that have the skills set needed to fill open positions. On the other hand, a massive pool of local, talented, diverse jobseekers have challenges accessing career opportunities. The workforce gap continues to widen, causing dire consequences: regional economic stifling, social inequity and individual hardships for the unemployed.

In order to identify and develop a more equitable and skilled workforce, we need to create strategic pathways to connect underrepresented jobseekers with untapped talent to gain access to high-wage, high-demand training and careers. Moreover, we need to address the outside barriers that currently prevent potential job seekers from being able to enter the workforce and feel comfortable doing so. The following plan outlines the CNYREDC strategic focus areas that will best support our continuing workforce pipeline strategy: supporting underprivileged individuals with strategic resources, providing more opportunities for individuals outside of the college track, and addressing outside barriers hindering ability to enter the workforce.

## “ALICE”

One major talent pool includes individuals who are working in low-wage jobs or who are underemployed, and whose income is below the basic cost of living for the county in which they reside. The United Way defines this group as “Asset-Limited, Income-Constrained, Employed” or “ALICE”. This category includes a large number of individuals who could benefit from career advancement; for example, in New York State approximately 44% of households have incomes under this level. Among Black and Hispanic households in New York State, over 60% were living below the ALICE threshold; young households (under

Marquardt offers interns the opportunity to grow with hands-on training on the job, which often leads to full-time employment opportunities after graduation. Photo Credit: Marquardt Switches, Inc.

age 25) had 72% living below the ALICE threshold; and single-female households with children had the highest percentage of households below the ALICE threshold of any group, at 76%\*\*.

To reach and effectively serve this population, the workforce system should place emphasis on upskilling individuals who are working in low-wage jobs, so they can advance to higher-wage employment. The workforce system is not currently set up to achieve this

---

\*ALICE in New York: A Financial Hardship Study” 2020, <https://www.unitedforalice.org/state-reports-mobile>. For data on ALICE workers in every county in New York State visit <https://www.unitedforalice.org/state-overview-mobile/NewYork>

Led by Le Moyne College, ERIE21 capitalizes upon the strengths of key educational, governmental, and business partners seeking to provide support to local students and feed the growing demand for computational, software and engineering talent. Photo Credit: Le Moyne College

outcome at scale. We need innovative, comprehensive strategies such as:

- Employer-informed training that includes front-end screening for job seeker skills, aptitudes and desire to work in a particular field.
- Paid classroom training combined with paid internships so working people can afford to reduce their hours and work towards a new career.
- Shorter, faster certificated training combined with structured on-the-job training or apprenticeship.
- Engaging career exploration for adults, which includes visits to companies and skills assessments to identify untapped talent;

- Networks to provide mentorship and entree into new careers and industries for diverse candidates.
- Outreach that goes beyond traditional social services organizations, to engage those who aren't accessing these services but could still benefit from career advancement.
- Employer training in Diversity, Equity and Inclusion (DEI) practices to ensure that new entrants are coming into welcoming environments.
- Advancing employer practices in upskilling, retention and advancement to ensure that people can stay in these jobs and advance within their chosen field.

### Talent Outside of College Bound Students

Employers seeking to fill their skilled workforce needs and job openings provides an incredible opportunity for individuals seeking careers outside of the traditional four-year college path. In fact, many employers have reevaluated previous job requirements and as such are removing minimum degree requirements and instead are hiring on the basis of demonstrated skills and competencies, especially since the company themselves can provide much of the skilled training and certifications required. This growing shift to skills-based hiring helps to address the ongoing skills gap crisis, while opening opportunities to Central New York residents, also provides our businesses with an abundance of untapped workforce talents right here in our very own communities.

The CNYREDC remains committed to the strategic focus areas that foster development of individuals outside of the traditional college route, and encourages the ongoing expansion of added or enhanced programs that will serve the evolving needs of both the employers and the underemployed. To do so, we need support and growth in the following areas:

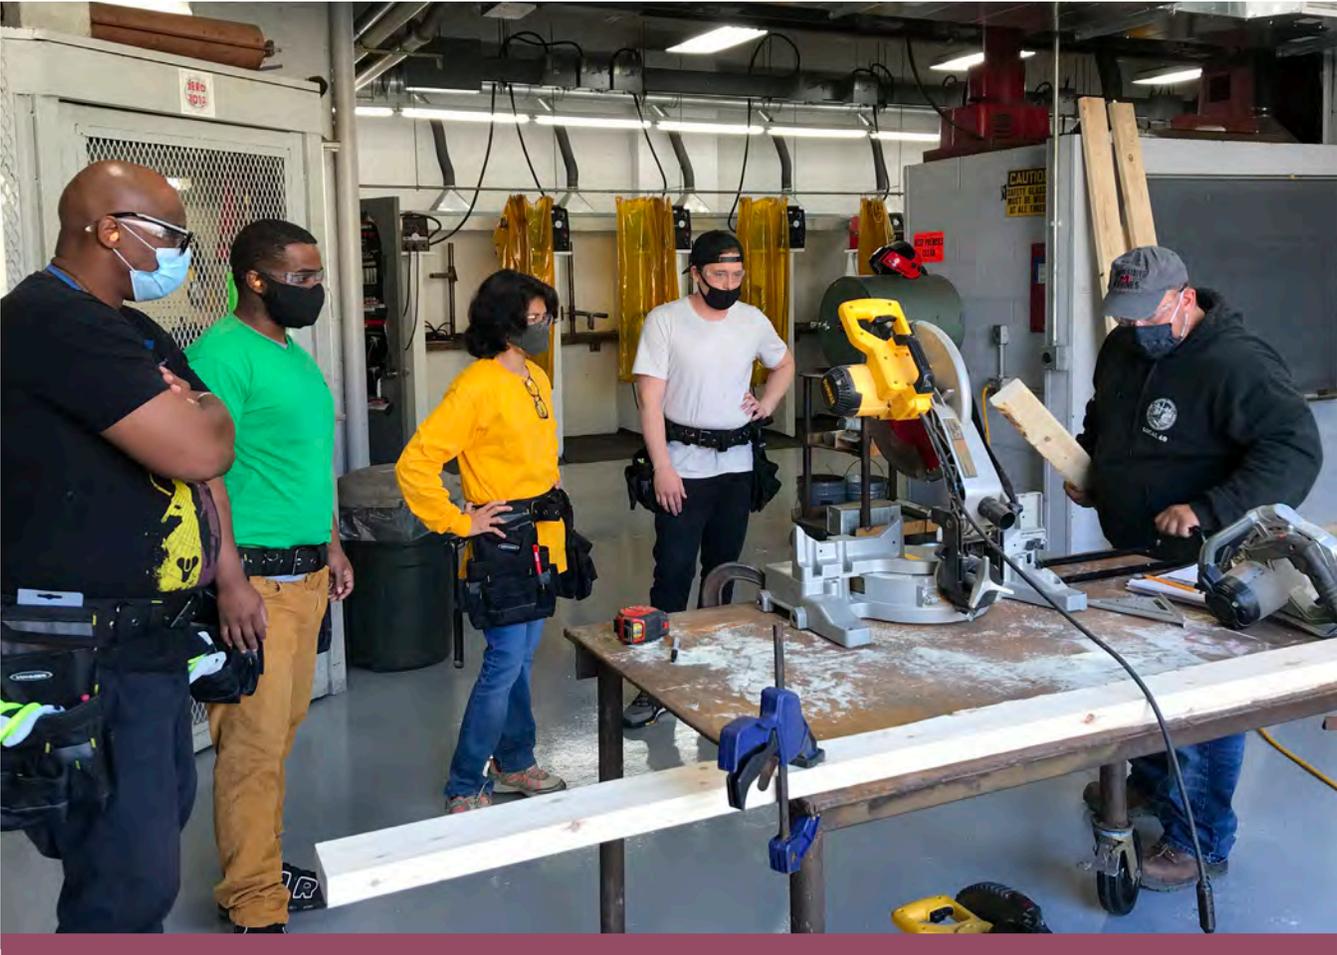

**Pre-Apprenticeship programming:** Apprenticeship expansion efforts continue across the state as industry government partners work to expand career talent pipelines. In Central New York, a youth apprenticeship pilot program launched at the end of June 2022. Based on the Finger Lakes Youth Apprenticeship Program (FLYAP), this initiative allows high school students as early as 11th grade the opportunity to gain on the job training and college credits for dual enrollment to prepare for their future careers in local industry.

**Early Childhood Education:** ERIE21 is an initiative spearheaded by Le Moyne College in partnership with state, city, and county government, the Syracuse City School District, Syracuse Academy of Science, and numerous public and private partners, including M&T Bank, JP Morgan Chase, Key Bank, and The Equitable. The program equips, empowers and enables individuals in our communities to pursue opportunities in tech and innovation right here in Central New York. ERIE21 programs and offerings include: two undergraduate certificate programs in Cybersecurity & Computer programming; a collaborative partnership with Hack Upstate and Centerstate CEO to deliver a Careers in Code Bootcamp; and an academic year and summer program for middle and high school students.

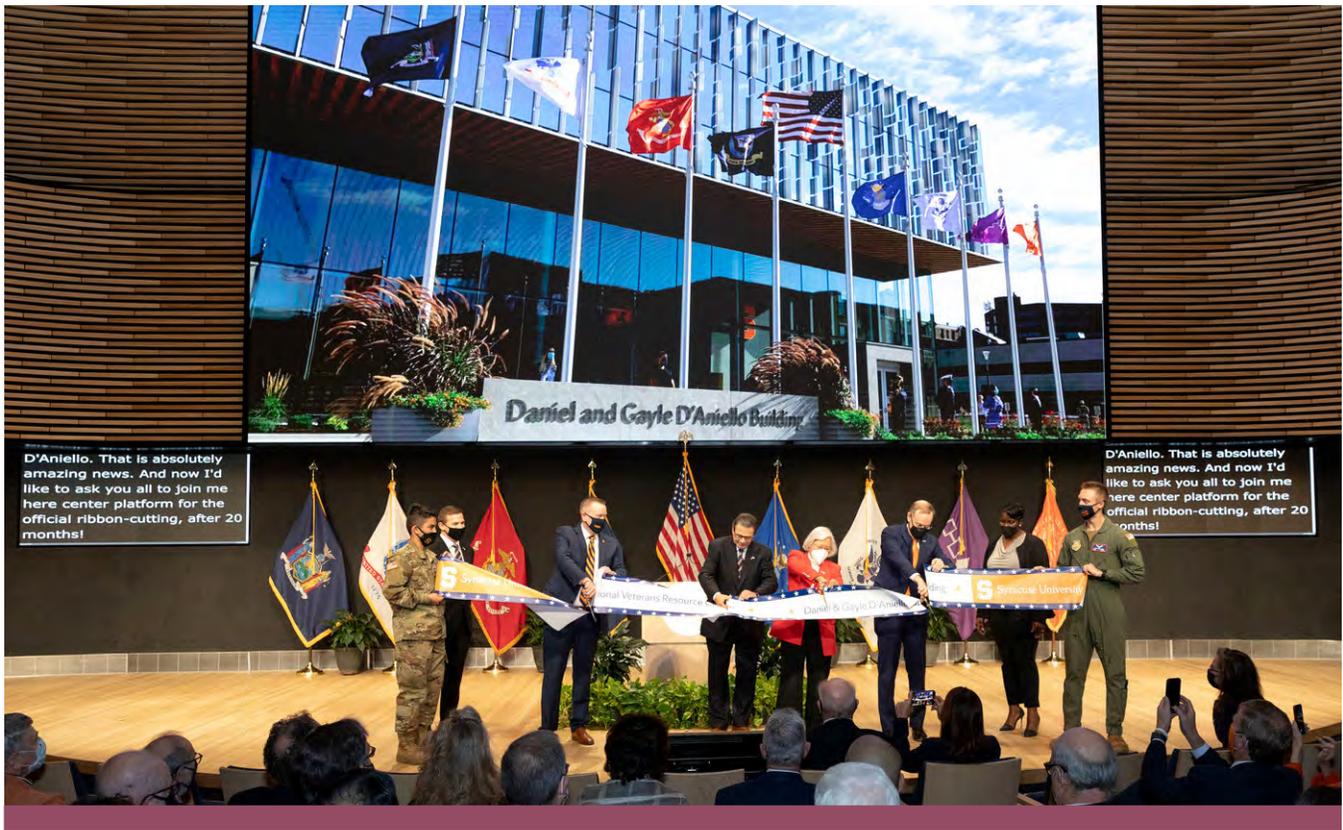

**Individuals Currently Outside the Workforce**

To effectively restart the economy, local companies need to find appropriate candidates for their openings. As the economy continues to reopen after the worst of

the pandemic, many people have yet to rejoin the workforce and are not included in unemployment numbers as they are not looking for work or utilizing unemployment insurance. For many different reasons, these individuals have left the workforce completely, but oftentimes barriers exist that prevent these individuals from getting job skills training they need to rejoin the labor force. Such barriers to entry include reliable and safe transportation options, affordable and safe childcare solutions, and affordability of workforce training. In order to properly address these barriers, the CNYREDC continues to work alongside government and industry to monitor labor market data to identify growth occupations where individuals can acquire both hard skills and soft skills in a short amount of time, in quality, career-path jobs with family-sustaining wages. Through strategic focus on these wraparound service areas detailed in the next section, we can and will empower our future workforce talent to safely and effectively enter the regional workforce.

## Veterans

More than 900,000 military veterans call New York State home, and an overwhelming percentage of those veterans live, work, and go to school in Central New York. Upstate New York counts more than 60% of the state's military veterans as residents, a percentage that is expected to grow in the next decade as more than 1.5 million service members make the transition from military to civilian life. It is clear that as a result of the region's close ties to Fort Drum (home to approximately 19,000 active-duty military members and 11,000 military spouses and military-connected children) and to major employers in the defense and technology sectors, Central and Upstate New York can emerge over the next decade as one of the most military-connected regions in the United States. Importantly, this positioning represents a burgeoning opportunity for economic development, job growth, and inward investment in the region.

In November 2021, Syracuse University formally opened the National Veterans Resource Center (NVRC) at the Daniel & Gayle D'Aniello building. The NVRC was a collaborative effort between Syracuse University, the community, and the state, and today is linking programs

and initiatives positioned to positively impact Veterans and their families on a local and national level. The University, community organizations, and local and state government partners are providing programs, trainings, events, conferences, and initiatives in the NVRC positioned to advance the social, educational, and economic situation of Veterans and military families.

Operating out of the NVRC is the D'Aniello Institute for Veterans and Military Families (IVMF), higher education's first institute dedicated to fully leveraging the intellectual, human, and social capital of higher education, in service to America's transitioning service members, Veterans and their families. The IVMF operates workforce training programs out of the NVRC which impact more than 10,000 transitioning service members, veterans and military families each year, many of them right here in New York State. Additionally, the IVMF recently launched Syracuse Serves, a collaboration with the city of Syracuse to serve veterans in Central New York by connecting them to local services including housing assistance, job training and placement, healthcare and legal aid. This public/private partnership is essential in caring for veterans in the local community and serves as an exemplary model for others around the country.

# Wraparound Services

Because jobseekers' lives can be complex, it's important to have a comprehensive array of services available across programs. Investment should occur not only at the direct services level, but also for workforce intermediaries coordinating these services. Intermediary entities are essential to bring a wide variety of services together, identify funding/build capacity, and maintain continuity and quality across programs.

To support these ongoing needs, wraparound services are necessary and need to be offered in order to support jobseekers at four phases: 1) to apply for and enter training; 2) to complete training; 3) to transition into a job; and 4) retaining a job. The CNYREDC has determined four key wraparound service areas to focus on for the continued development of employees: childcare, transportation, financial assistance and legal coaching.

## Childcare

For many families and individuals seeking to enter the job market, one of the biggest hurdles they struggle overcoming is ensuring and attaining safe, reliable childcare for their children during work hours. The issues that lie within the childcare crisis in New York State are both multifaceted and complicated. Just as transportation and vicinity issues are a concern to those job seekers looking to get to a job, the same goes for finding localized childcare near their homes and or places of employment.

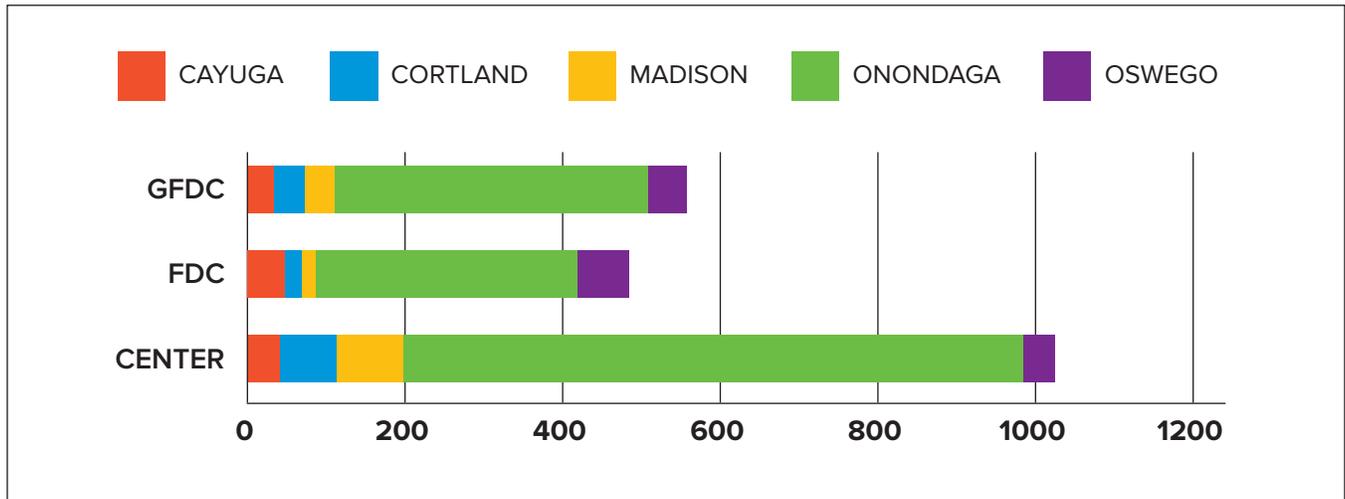

The childcare desert challenges have been a specific focus for the Childcare task Force and the REDC at large over the past year. Specifically, the region consistently has a need for high-quality infant care. The pandemic left parents with limited options for school

Children color at a Learn As You Grow early education center. Photo Credit: Joshua LaGrow

## CAPACITY FOR INFANTS IN REGULATED CHILDCARE PROGRAMS

The CNY region serves 2,074 infants which accounts for 10% of all children in regulated child care programs.

aged children, with major industries and businesses in the region creating a need for non-traditional hours of care including weekends and evenings so employees can work. Additionally, the region also has a significant need for sustainable home-based Family or Group Family childcare in rural areas that are 15 miles or more outside of the city centers.

In addition to lack of availability, New York is one of the most expensive states for childcare, with the monthly costs for childcare rivaling mortgage payments. The cost of childcare can lead parents to turn down work opportunities and miss work when arrangements fall through.

Another troubling and grown concern within the childcare industry has to do with its own workforce. Although the cost of care is high, childcare wages are extremely low because the child-to-adult ratios limit the ability to generate revenue. As a result, the Childcare industry faces significant challenges in recruiting and retaining a high-quality workforce. Many employees who work for childcare centers are at or near the federal poverty line due to low wages. According to the US Bureau of Labor Statistics, the median wage for a childcare worker is just \$27,490. This low pay rate leads to high employee turnover which can reduce the number of children that can be cared for while complying with adult-to-child ratios regulations. Turnover is also costly to the childcare center in terms of recruitment and on-boarding requirements, and it is detrimental to children's development.

In 2019, the CNYREDC created a Childcare Task Force,

calling on experts and advocates from the five counties to identify the most pressing childcare issues for the CNYREDC to focus on in the next year. After seeking community input, the preliminary findings outlined these major regional concerns:

- Lack of available spaces in regulated childcare programs.
- Costs of childcare rivaling that of a college education.
- Shortages of skilled childcare providers due to low wages; and
- Extremely low childcare wages due to child-to-adult ratios limiting revenue generation.

The CNYREDC Task Force determined the best strategic focus for the community and the future of the childcare industry was to address the overarching theme of workforce issues within the industry. These include finding available resources to allow for higher wages; more opportunities for training and apprenticeship-style programs to recruit childcare workers; and programs and resources for owners and operator of facilities to increase the number of quality programs and available slots for children. In continuing in our efforts, the Task Force will continue to work on the workforce struggles within the industry, advocating for new and integrated apprenticeship style programs to find long term workforce talent, as well as find other opportunities to work the State to find ways to increase childcare wages and opportunities within.

**Transportation**

For low-income job seekers in Central New York, transportation is one of the most persistent and challenging barriers to job attainment and retention. Many businesses that offer good jobs and career pathways are located in remote areas, away from population centers, and/or disconnected from public transit. This dynamic is underscored by the fact that:

- 67,285 jobs in the Syracuse MSA are located outside of one half mile of transit; and,
- Only 19.8% (57,443) jobs in the Syracuse MSA are located within a 30-minute transit commute.

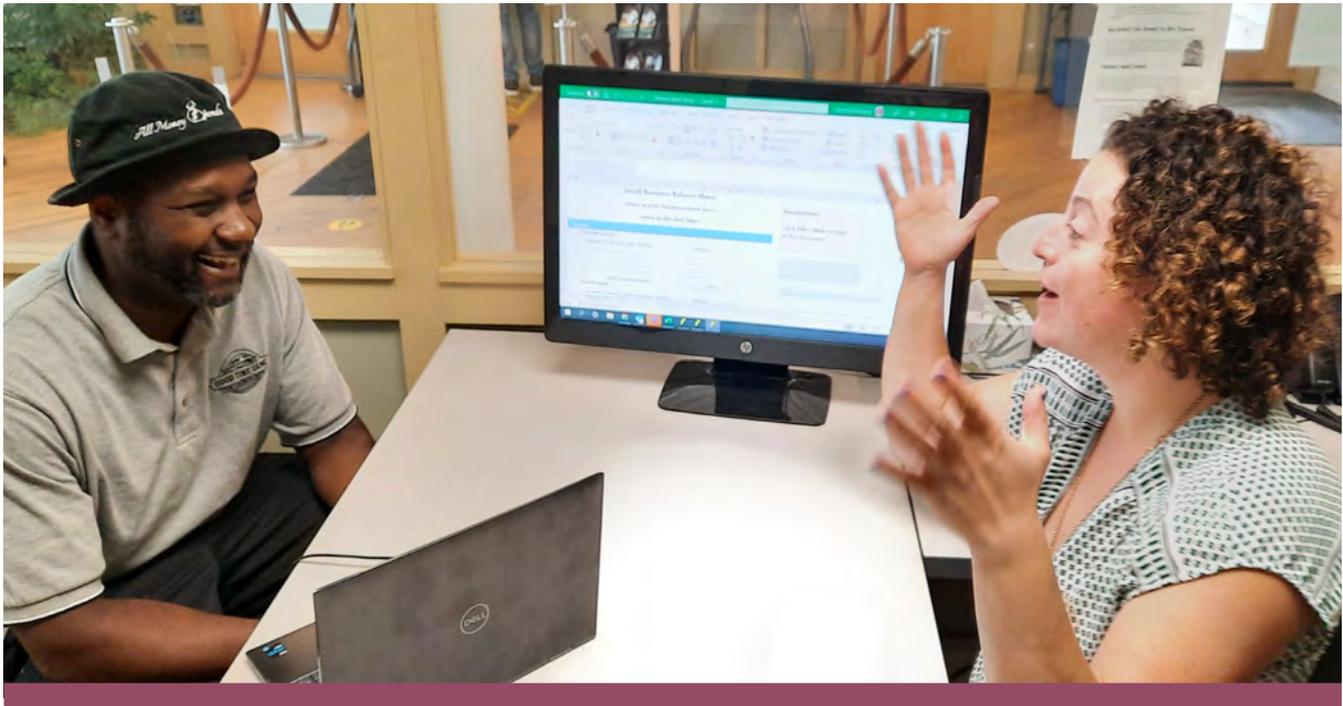

Central New York lacks both the population and job density required to make mass transit a viable option for many areas, requiring an overreliance on personal vehicles. Unfortunately, many job seekers lack the means to buy cars when they are struggling to find steady work. Their job searches become limited to workplaces within walking distance or on bus lines (and then only if bus routes align with their shifts). Meanwhile, for many Central New York employers, the struggle to find and keep workers represents their greatest barrier to growth.

More specifically, there are a number of different kinds of challenges:

- Jobseekers who do not own a car and live in the Syracuse metro area, but could be candidates for job opportunities that are located in outlying towns in Onondaga County or in other counties. This issue is especially acute in manufacturing and construction. In this situation, both job seekers and employers are missing opportunities - employers are losing a talent pool and jobseekers aren't applying to jobs if they can't get to the jobsite easily.
- Employers that are not located on or near a Centro bus line or employers with shifts that do not align with bus schedules; these situations present challenges not only for new applicants but for incumbent workers who may have inconsistent transportation.
- Some entire occupations (i.e. construction workers) where a car is necessary in order to work, since a worker could be assigned to any jobsite, and job sites are rarely on public transit lines. Additionally, construction workers often need to bring their own tools with them, which is not easy to do on a bus.

Syracuse residents utilize bus transportation at the Centro Transit Hub in Downtown Syracuse. Photo Credit: Downtown Committee of Syracuse

Jery Augustin, owner of small business Augustin Real Estate Group LLC (left) discusses balance sheets with Cooperative Federal's Business Program Navigator, Hanah Ehrenreich Photo Credit: Cooperative Federal Credit Union

- Workers with children for whom bus transit is not a viable option because they need to drop off and pick up children at child care; this extra stop makes using public transit extremely time-consuming.
- Employers in outlying areas who need workers but whose wages are too low to support the high cost of insuring and maintaining a car, as well as the cost of a car loan and gas. Additionally, workers with low/damaged credit or limited savings will have difficulty repairing or maintaining their own car.

To address these wide ranging issues, Central New York business, community, labor and transportation leaders could convene a Workforce Transportation Council to align transportation with employer and worker needs, identify gaps and pilot new strategies. For example, this Council could work with Centro to identify changes in bus schedules or lines and work with employers to align shift times with existing bus schedules; develop alternatives for “last mile” transit; continue to expand Veo (bikeshare); Vehicles to Work (car access); Commute CNY (vanpools); and explore new options including electric vehicle charging systems, all of which can connect workers in low-income neighborhoods with employment opportunities.

### Asset Building

Individuals seeking to enter the workforce, re-enter after a hiatus or change careers through a workforce development program often need to address issues of banking, credit, debt and savings in order to successfully make this transition.

- **Banking.** Collecting a regular paycheck is most easily done by using a basic bank account. However, according to the FDIC, many low-income people are excluded from the banking system. Approximately 5% of U.S. households are “unbanked” (no checking or savings account) and 11% are “underbanked” (still using some fringe financial services). This happens for a variety of reasons including minimum balance or identification requirements; lack of trust in banks; and issues with credit or previous bank accounts. Additionally, banking access is an equity issue: “Nationally, 48% of Black households and 42% of Hispanic households are unbanked or underbanked, compared to less than 14% of white households.” Without a basic bank account, individuals who have secured employment through a job training program lose income to check cashing fees or payday lenders.

\*Source: <https://joinbankon.org/about/>

- **Credit/Debt/Savings.** If direct financial support is not available to workforce development program graduates, affordable credit (i.e. a credit card) is important for jobseekers because it allows them to pay for up-front or emergency expenses as they are getting started in a new job, including uniforms, professional clothing, tools, reliable cell phone, computer, home internet connection, and/or union dues etc. For example, an individual starting in a construction job will need to purchase tools, boots and clothes that can add up to hundreds of dollars; an individual starting a professional office job for the first time will need to buy multiple outfits, dress shoes etc. Additionally, retaining a job may require an individual to use credit to address emergencies such as a car breakdown or backup childcare.

Reducing debt and cleaning up one’s credit report will allow individuals to improve their credit score, which can improve job retention. For example, if an individual doesn’t own a car, a prime credit score can allow them to purchase a car at an affordable price; credit scores are also one of the most influential factors in determining auto insurance rates. And incremental savings – including matched savings accounts – allow individuals to use savings instead of debt for emergencies.

To achieve these goals, workforce development programs should embed financial coaching into all programs and make this service available to all participants. Financial Empowerment Centers provide a comprehensive model for providing financial coaches; for New York cities/towns without a Financial Empowerment Center, resources are available (<https://fecpublic.org/>). Financial coaching is an essential core service; because it is more customized and long-term, it is more effective than only providing one-time classroom financial literacy programs.

**Legal Assistance**

Individuals in workforce development programs need free legal advice and representation for a wide variety of issues affecting their short- and long-term employability. Legal services could be embedded within every workforce development program and made available to all participants. Legal issues facing jobseekers can include:

- **Driver’s License:** jobseekers without a valid driver’s license face issues in providing basic identification documentation to employers, as well as legally driving a vehicle to work. Legal services organizations can aid in reviewing and correcting DMV abstracts, which may involve resolving errors, rectifying criminal or child support issues, and/or paying off fines/fees.
- **Public benefits:** if program participants are receiving TANF, food stamps, subsidized childcare, or other public assistance, they will need access to legal support as they transition to work to ensure they retain the benefits they are entitled, including those who may encounter a “benefit cliff.”
- **Criminal record:** legal services are needed to clear up criminal record issues that may show up on a background check for a job, over half of which are likely to be errors:

“In 2012, the Federal Bureau of Investigation (FBI) provided nearly 17 million criminal records for employment- or licensing-related background checks – six times as many as in 2002 (Neighly & Emsellem 2013). Despite their growing use, two analyses estimate that **50 to 80% of FBI criminal records are inaccurate.**”\*

Tech Garden orientation for new members. Photo Credit: CenterState CEO

- **Housing/eviction:** housing instability is widespread among those who are un/underemployed, making it more likely that jobseekers will need assistance dealing with eviction:

“The combination of severe rent burden, lost wages, and little to no emergency savings is likely to result in large-scale housing instability. **In New York State, nearly three quarters of renter households with annual incomes below \$15,000 paid more than 50% of their income toward rent (severe rent burden) in 2018.** 53% of renter households that earned between \$15,000 and \$30,000 were severely rent burdened, as were 20% of those earning between \$30,000 and \$50,000.”\*

Low-income jobseekers may also need additional kinds of civil legal services for a variety of issues affecting their employment or income including:

- **Employment law:** issues including safety, pay,

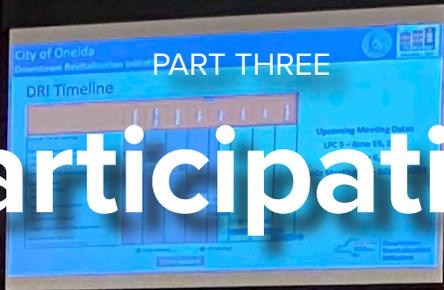

hiring, scheduling, harassment and/or termination.

- **Consumer issues:** including bankruptcy and debt, which could affect repossession or acquisition of a car needed to get to work.
- **Issues affecting transgender workers:** issues such as name/gender change that can affect employment documentation or access to health care benefits.
- **Immigration:** includes any changes to immigration status that could affect employment.
- **Child support collections:** for noncustodial parents this could include wage garnishment; for custodial parents this could be enforcing collections against the other parent.

# Participation

# Work Groups

The CNYREDC work groups play an essential role in helping the council perform its duties. Bringing together experts in a given sector allows the council to hear from knowledgeable voices about the issues they are facing and provides a forum for our members to ask questions. While COVID hindered the efforts of these groups throughout the last two years, we are committed to consistently engaging them in the coming year and remain open to adding new workgroups as the need arises. In 2022, two workgroups are actively convening on behalf of the council. They include:

- Agribusiness
- Childcare Taskforce

## Agribusiness Workgroup

Agriculture remains one of the most important sectors of the Central New York economy. The agribusiness workgroup remains committed to advancing the interests of these businesses, specifically in supporting their workforce development efforts. Over the next year we will continue to advance our priorities in this industry, including controlled environment agriculture, the Grow NY business competition, NY Grown and Certified and aseptic packaging.

### Childcare Taskforce

Well before the pandemic, the need for quality, affordable, reliable and accessible childcare has been a multifaceted issue for our region and its economic vitality and remains a pertinent issue today. Employers understand affording reliable childcare services and opportunities to their employees will help in their workforce needs and the ability to operate effectively and efficiently.

In 2019, the CNYREDC formed a Childcare Task Force, calling on experts and advocates from the five counties to identify the most pressing childcare issues for the CNYREDC to focus on in the next year. After seeking community input, the preliminary findings outlined these major regional concerns: lack of available spaces in regulated childcare programs, costs of childcare rivaling that of a college education and not feasible for families, shortages of skilled childcare providers due to low wages and lack of programs; and extremely low childcare wages due to child-to-adult ratios limiting revenue generation.

The CNYREDC Task Force determined the best strategic focus for the community and the future of the childcare industry was to address the overarching theme of workforce issues within the childcare industry. These include finding available resources to allow for higher wages; more opportunities for training and apprenticeships-style programs to recruit childcare workers; and programs and resources for owners and operators of facilities to increase the number of quality programs and available slots for children. <b>Anne Withers</b>	Childcare Development Council

continues to remain committed to supporting initiatives to address these workforce childcare issues, and will reconvene the Childcare Task Force in Fall 2022 in order to reassess the landscape and regional needs post pandemic.

# Community Outreach and Engagement

Community outreach and engagement is a vital component of the success of the CNYREDC. We strive to be visible and accessible to our businesses, leaders and residents to ensure they are able to access the resources they need. The Central New York region is made up of five diverse counties that include urban and rural areas whose needs are as diverse as its residents.

While the pandemic has limited our ability to hold large public meetings, we still made it a priority to hold multiple CFA workshops, with at least one held in each county. We also utilized virtual sessions to ensure more people could attend the informational sessions. In total, 10 CFA workshops were held with hundreds of businesses attending.

As the year continues, we plan on making dozens of additional business visits to understand how we can best serve our community in the coming year.

**Central New York  
CFA Calendar of Events**

Please join Empire State Development staff for Central New York's Consolidated Funding Application information sessions to learn more about the funding available in Round XII of the REDC initiative. These information sessions are hosted by ESD team members and consist of an overview of the REDC Initiative, application tips, as well as time for questions about the CFA process. You may register for any meeting of your choosing as listed below:

<b>Wednesday, 6/1 – Virtual</b> 9:00am – 10:30am In partnership with CenterState CFO <a href="#">RSVP Here</a>	<b>Friday, 6/3 – Virtual</b> 2:00pm – 3:30pm In partnership with Cayuga County <a href="#">RSVP Here</a>
<b>Wednesday, 6/1 – In Person</b> 3:00pm – 4:30pm In partnership with Onondaga County and the City of Syracuse <a href="#">RSVP Here</a>	<b>Monday, 6/6 – Hybrid</b> 1:00pm – 2:30pm In partnership with Cortland County <a href="#">RSVP Here</a>
<b>Thursday, 6/2 – In Person</b> 1:00pm – 2:30pm In partnership with Onondaga County and the City of Syracuse <a href="#">RSVP Here</a>	<b>Wednesday, 6/15 – Virtual</b> 3:00pm – 4:30pm In partnership with CNYREDC <a href="#">RSVP Here</a>
<b>Thursday, 6/2 – In Person</b> 5:30pm – 7:00pm In partnership with Madison County <a href="#">RSVP Here</a>	

Scan QR Code to be directed to the CNYREDC website to register for the above events.

**CFA Application  
Deadline  
July 29, 2022  
4pm Sharp!**

Please RSVP for any info session above at:

PART FOUR

# Previously Funded CFA Projects

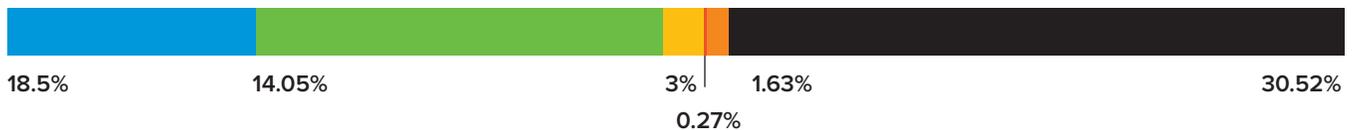

# Overview of Previously Funded Priority Projects

As the economy continues to recover from the pandemic many of our strategically important industries have seen robust growth, fueled largely by support from the Central New York Regional Economic Development Council. This annual report serves as a blueprint for CNYREDC to score and recommend funding for projects that align with our region’s strategic priorities and goals. Since 2011, more than \$150 million has been invested across 207 projects\*, resulting in nearly \$1.7 billion (11 to 1 ratio) in private investment. To date, 64% of those projects have been completed or are on track to be completed.

## SUMMARY STATUS OF PAST PRIORITY PROJECTS BY ROUND

- Project is complete
- Project concerns need to be resolved
- Project is on schedule
- Project contract not yet executed
- Project is progressing more slowly than anticipated
- Project canceled or funding declined

Project Status	Round I	Round II	Round III	Round IV	Round V	Round VI	Round VII	Round VIII	Round IX	Round XI	Total	Total %
Project is complete	12	14	10	16	9	2	4	1	-	-	68	18.5%
Project is on schedule	11	11	5	8	20	14	27	23	23	27	169	14.05%
Project is progressing more slowly than anticipated	-	-	2	1	2	-	3	3	-	-	11	3%
Project concerns need to be resolved	-	-	-	-	-	-	1	-	-	-	1	.27%
Project contract not yet executed	-	-	-	-	-	-	-	-	6	-	6	1.63%
Project canceled or funding declined	8	16	22	19	21	5	8	5	8	-	112	30.52%
<b>TOTAL</b>	<b>31</b>	<b>41</b>	<b>39</b>	<b>44</b>	<b>52</b>	<b>21</b>	<b>43</b>	<b>32</b>	<b>37</b>	<b>27</b>	<b>367</b>	

\*excluding terminated projects

## LEVERAGE OF STATE INVESTMENT IN ALL PAST PRIORITY PROJECTS

The table below lists the ratio of the total investment in past priority projects to the state investment of the REDC.

	Total Amount of ESD Capital Fund Awards	Total Project Cost	Total Number of CFA Priority Projects	Ratio of Total Cost to Total ESD Capital Fund Awards
Round I	\$25,442,550	\$312,503,961	19	12:1
Round II	\$13,625,000	\$135,394,869	20	10:1
Round III	\$9,485,000	\$110,771,487	13	11:1
Round IV	\$19,670,000	\$134,334,841	21	7:1
Round V	\$14,727,500	\$288,840,443	26	20:1
Round VI	\$4,105,307	\$21,976,370	12	5:1
Round VII	\$16,146,500	\$107,411,340	28	7:1
Round VIII	\$16,393,000	\$206,785,958	23	13:1
Round IX	\$19,382,000	\$261,963,627	23	13:1
Round XI	\$11,520,996	\$103,988,506	21	9:1
<b>TOTAL</b>	<b>\$1,685,971,402</b>	<b>\$150,822,853</b>	<b>207</b>	<b>11:1</b>

Note: Excludes terminated projects and five-year payroll

# GEOGRAPHIC DISTRIBUTION OF PAST PRIORITY PROJECTS

- Project is complete
- Project is on schedule
- Project is progressing more slowly than anticipated
- Project concerns need to be resolved
- Project contract not yet executed
- Project canceled or funding declined

# Overview of All Previously Funded CFA Projects

The consolidated funding application has streamlined the process for accessing state resources, allowing more entities the opportunity to apply and be awarded. The application allows individuals to access over 20 different programs across 10 state agencies. Since 2011, more than \$416 million has been invested across 775 projects\*. In round 11 alone, 87 projects received nearly \$54 million projects and leveraged more than \$200 million. We are excited to continue investing in our businesses and workforce talent as the region remains an attractive place to work, live, and visit.

## SUMMARY STATUS OF ALL PAST PROJECTS

- Project is complete
- Project concerns need to be resolved
- Project is on schedule
- Project contract not yet executed
- Project is progressing more slowly than anticipated
- Project canceled or funding declined

Project Status	Round I	Round II	Round III	Round IV	Round V	Round VI	Round VII	Round VIII	Round IX	Round XI	Total	Total %
Project is complete	67	44	54	49	48	43	30	15	3	–	353	37.28%
Project is on schedule	11	13	14	13	27	26	67	67	75	87	400	42.24%
Project is progressing more slowly than anticipated	1	–	2	1	3	2	5	2	2	0	18	1.90%

# Acknowledgments

# Acknowledgments

The Central New York Regional Economic Development Council is so grateful to everyone who committed time and energy to make this report possible. These dedicated individuals are the reason our region continues to see so much success. We are excited to continue partnering with them to bring new jobs, workforce training and opportunity to the residents of Central New York. From the bottom of our hearts, thank you for all that you do!
